Liberty Missouri Stake
MEETINGHOUSE TECHNOLOGY

Using online Media in leadership training or classroom instruction

Online media is becoming more prevalent in gospel training and leadership, however, slow Internet connections in our meetinghouses cause buffering and poor viewing experiences. There are options open to members of the Liberty Missouri Stake to provide a better viewing experience through education and technology.

Due to expected demand from the new Youth Curriculum, and the popularity of online media clips, the Liberty Missouri Stake is investing in technology allowing all members access to use this media in their classroom instruction.

The Following pages will provide information to members on using the technology provided in meetinghouse libraries.

Playing a 'Mormon Message' or other church provided video in the meetinghouse

1. Downloading the video to your local laptop, smartphone, or tablet computer:

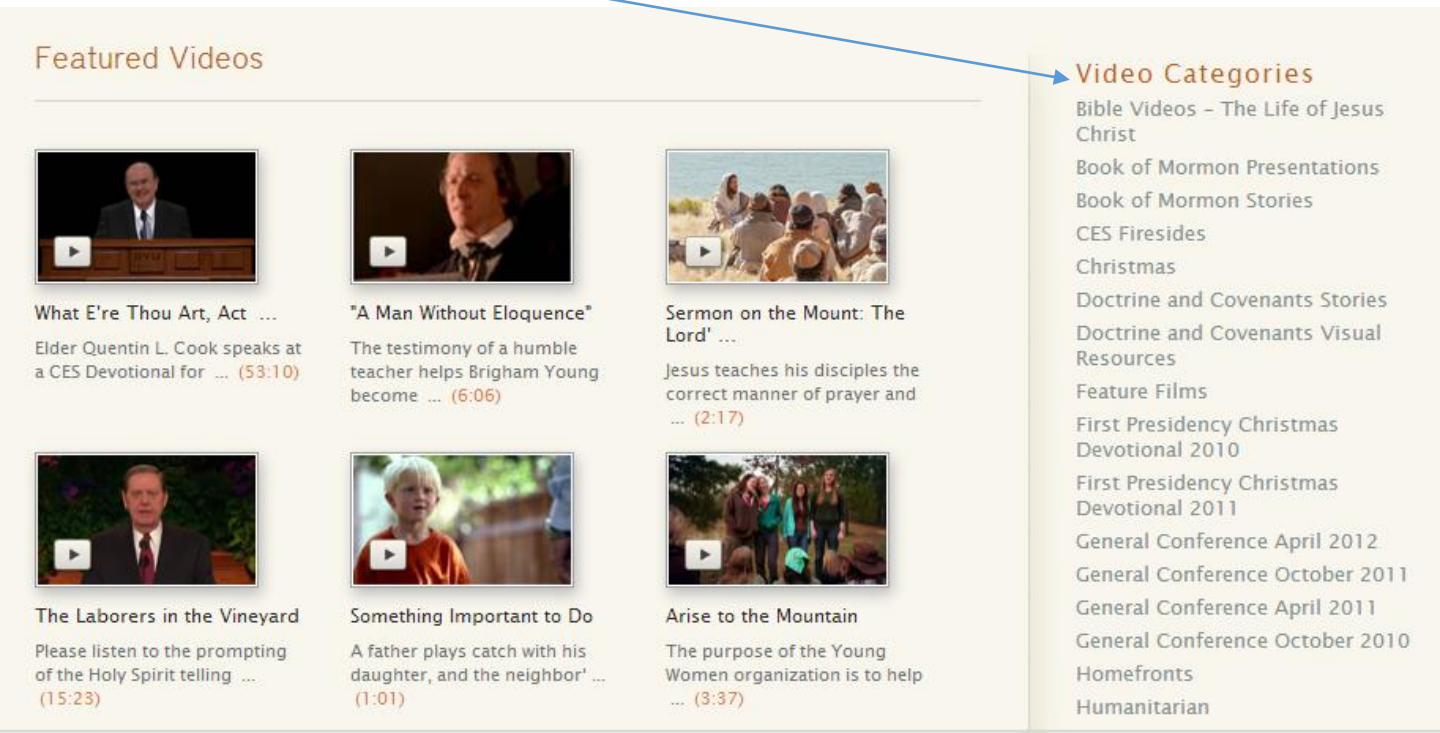

2. Using the Roku Media Streaming devices with meetinghouse library Televisions.

Downloading video to your local laptop, smartphone, or tablet computer:

LDS.org Media library – http://medialibrary.lds.org

Select a Category on the right

Choose a video from the category Selected

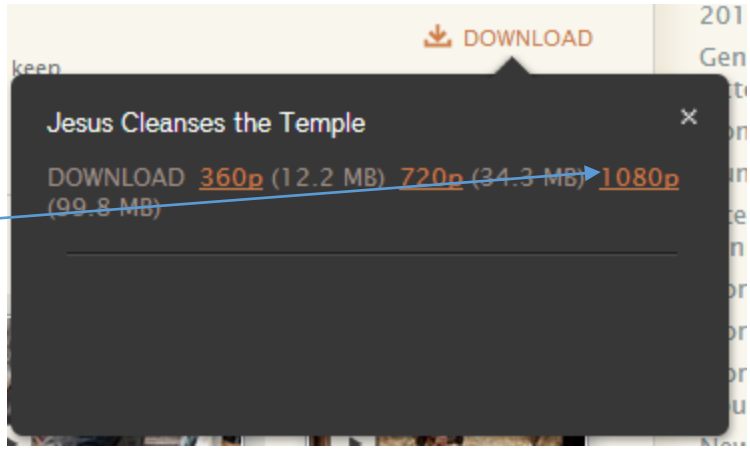

Liberty Missouri Stake
MEETINGHOUSE TECHNOLOGY

Select Download on the bottom right side of the page

Clicking Download 'expands' an additional box allowing you to choose a video quality. The higher the quality of the video, the larger the download file will be on your laptop/smartphone/tablet. Select the video quality and the download begins.

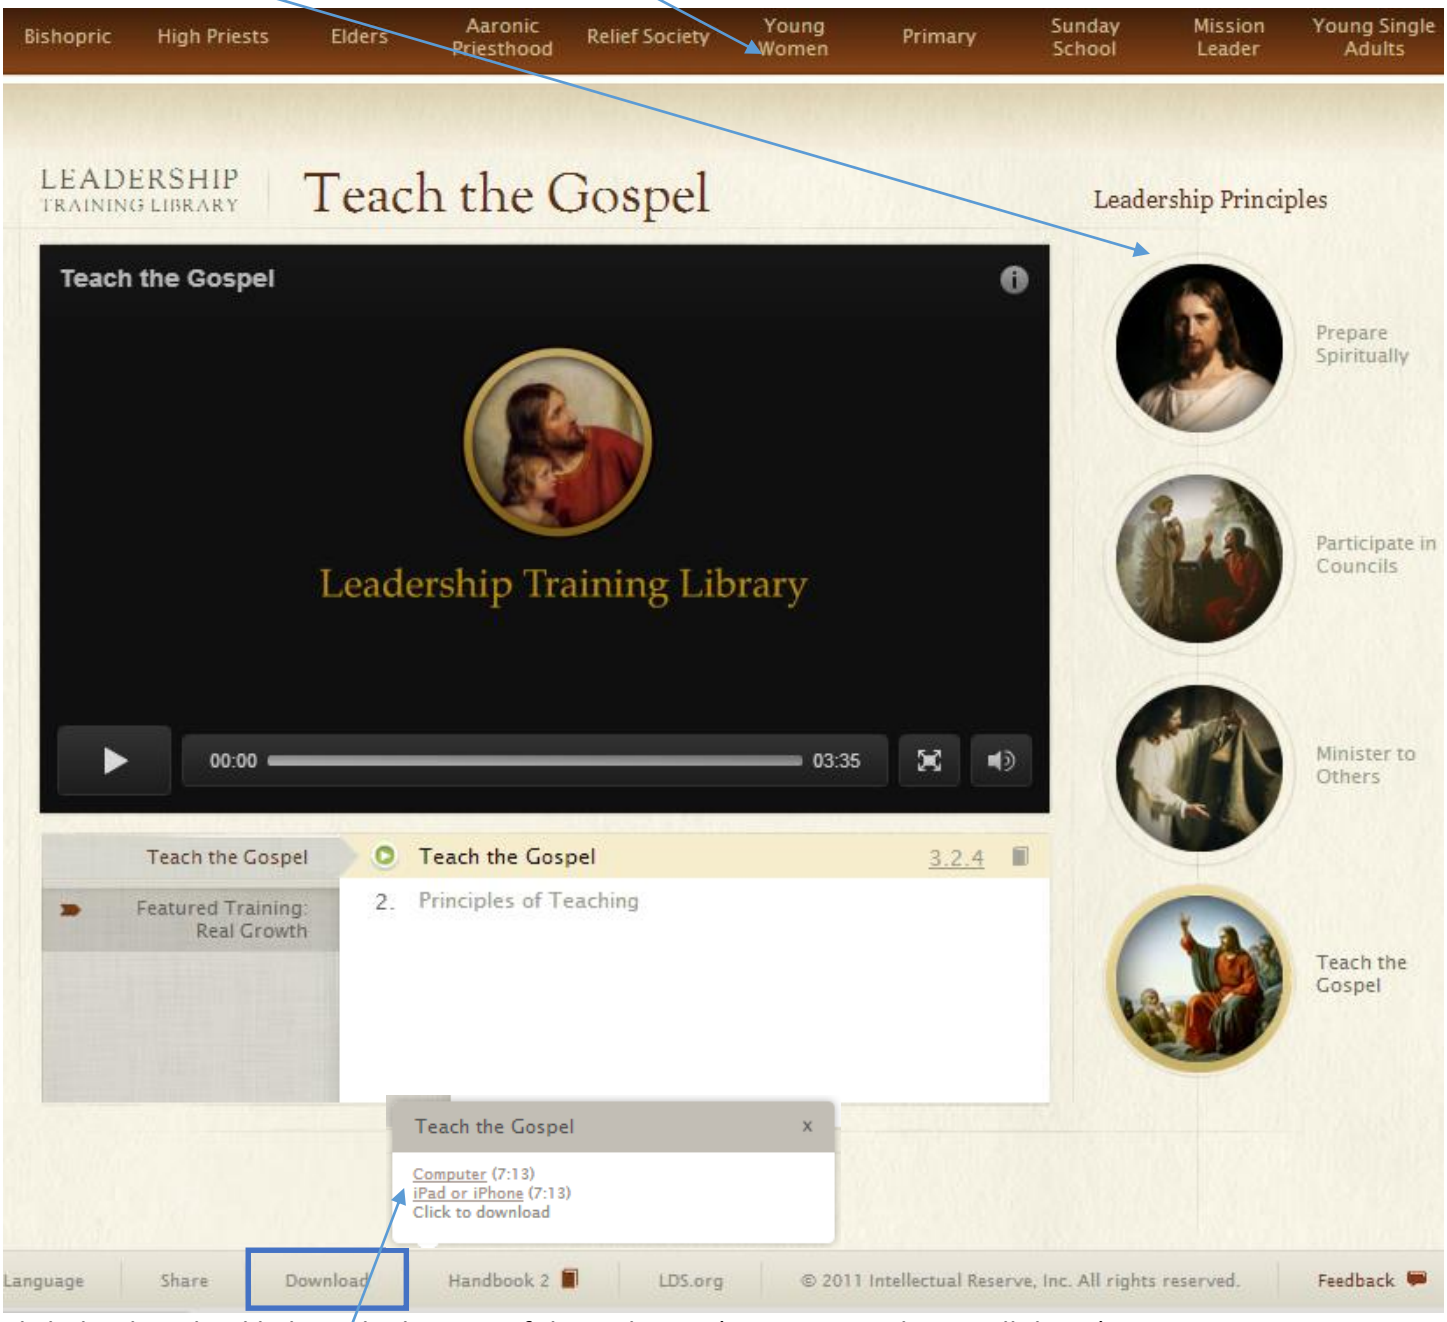

Note: *It is up to the individual to know how to retrieve the video file and play it on their device.*

Downloading Media Frequently Asked Questions (FAQ)

Q: What is the difference between 320p, 720p, and 1080p video files?

A: In simple terms this refers to the number of lines of horizontal resolution on a display (old CRT TV or newer LCD TV). The higher the number the more lines of resolution which delivers a higher-grade picture.

Q: Will a high quality 1080p file play if I connect my laptop/smartphone/tablet to an older CRT Television?

A: Yes, many devices will provide a video out capability (RCA Jacks Red/White/Yellow) cords they will connect to the television and play.

Q: What type of connections are supported in our meetinghouse library televisions?

A: Meetinghouse libraries that are equipped with LCD Televisions support the following inputs: **VGA (computer), RCA, and HDMI.**

Note: Cable kits are provided for each meetinghouse library equipped with LCD Televisions

A: Meetinghouse libraries that are equipped with CRT Televisions support the following inputs: **RCA**
