I am an assistant district clerk with permissions correctly set in MLS/LCR.

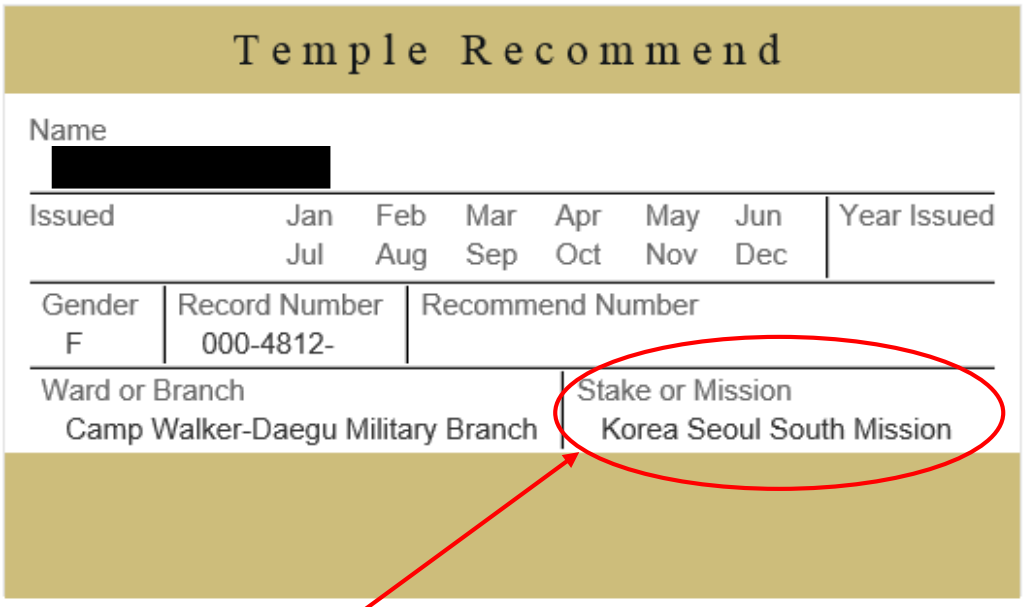

In LCR I'm attempting to activate Temple Recommends however am unable to do so because it has us affiliated with the Korea Seoul South Mission. I know the system says "Stake or Mission", however when we attempt to activate we get an error that says we don't have permission in the assigned mission.

Is it possible to get the system to affiliate us with our correct district? The Stake or Mission block should read Seoul Korea Military District.

We are currently still having to use MLS to activate temple recommends.

Please advise.

LCR system generated TR

Should read: Seoul Korea Military District
