This is a set of parts that will wirelessly connect the chapel's RecordOut Jack to any device you have.

You can connect any PC/Apple laptop, PC/Apple desktop, iPhone, iPad, Android phone, MEVO camera, or PtzOptics camera. The wireless MOVO transmitter accepts mono and stereo mic/line level signals. The MOVO receiver audio output is adjustable (60db range) from line level down to mic level(less than 1mv). The receiver also has a headphone jack so you can monitor the audio.

You will need the following parts:

6-12ft TRS to TRS cable
https://www.amazon.com/Extension-Braided-Zerist-Tangle-Free-Headphones/dp/B07QF1VRPB/

MOVO WMX-20 Wireless System w/included 1ft TRS cable
https://www.amazon.com/Movo-WMX-20-48-Channel-Microphone-Transmitter/dp/B082BG2F7Q/

That's all you need to connect to a laptop that has 2 audio jacks (one TRS mic jack and one TRS headphone jack), or a MEVO camera, or PtzOptics camera.

Add this 2K ImpedanceMatching TRS to TRRS Adapter if you want to connect to laptops or phones that have a single TRRS Audio interface jack.
https://www.amazon.com/Riqiorod-Micropohne-Adapter-Microphone-Cellphone/dp/B07HF39FXQ

You will also need this TRRS to Lightning Adapter (or equivalent) to connect to iPhone/iPad.
https://www.amazon.com/Lightning-BOYA-Certified-Compatible-Microphones/dp/B082B2DJFR/

When everything is connected you will need to set the MOVO audio level and your device's gain/volume controls appropriately.
