GENERAL SATELLITE PROGRAM INSTRUCTIONS FOR THE STAKE TECHNOLOGY SPECIALIST

(Please keep these instructions near the satellite receiver.)

Have the following information ready when you call the help desk for technical assistance:

- Building property number (available from the facilities manager): _____.
- Satellite receiver number (read it from the front panel of the satellite receiver).

Before Each Satellite Program

An audio and video system test is conducted before each broadcast. The audio portion of the test consists of music interrupted periodically with verbal identification of the Church satellite network and the specific language channel.

Check the following:

1. Turn on the monitor. Verify that you are receiving a prefeed program. Set the chapel sound system to a comfortable listening level, and check for needed adjustments to the video projector.
2. Set up television sets at building locations as needed. Verify that video and audio are working. Closed-captioning for the hearing impaired is usually viewed on a television set.
3. Verify that the correct languages are being received.
4. Adjust lighting in viewing areas to allow for good picture quality and note taking.
