Utrecht Ward 062707 The Netherlands

Problem: Bank statements can’t be download - disappear an ERROR!

Requesting bank statements is done through Finance > Reports.
After entering the desired dates and click on Create Report button then a link is generated.
(See Green circle)

When you click on the link created, this message below appears to the bishop

Or this message to the counselor: Blocked!

Or this message on me:
Safari can't open the page.
Safari cannot open the page 'blob:https:/lcrffe.churchofjesuschrist.org/73a71715-0e3d-4378-beaa-bd7c0b1e9d34'. The error is: 'The operation could not be completed.
(WebKitBlobResource error 1.)' (WebKitBlobResource:1)

Anyway we all, after clicking on the link, do not get a PDF downloaded!
As a result, finances have not been updated for over three weeks.

The problem really lies in the programming of this Report component.
